

Reviewer1 Reviews	Address
1. Strong Experimental Design.	Already addressed.
2. Specifying the type of explanation used in the XAI interface would enhance the reproducibility of the findings.	The types of explanation of XAI interface have been specified in the methodology section in Interface Design part.
Reviewer2 Reviews	Address
1. The manuscript is not well written and lacks clarity throughout.	The writing style of the manuscript has been enhanced and made it easy to understand.
2. The methodology and results are insufficient to support the conclusions..	Conclusion Section has been enhanced and made it compatible with both Methodology and Results and Discussions Section.
Reviewer3 Reviews	Address
1. The work demonstrates strong technical depth and analytical rigor. The theoretical discussion is coherent and logically structured. Experimental results effectively support the analytical findings.	Already addressed.
